Esteban Garzon, Statistical Consultant | Data Scientist | Data Analyst

Quito, Ecuador, (593) 996788376, estebandre2@hotmail.es

LINKS

LinkedIn | Portfolio: estebangarzon.com

Statistical Consultant and Data Scientist with strong experience analyzing complex datasets, validating data quality, and translating quantitative findings into clear business and operational insights.

Skilled in statistical analysis, predictive modeling, reporting, ETL-style data preparation, dashboards, and stakeholder-facing summaries using Python, SQL, Excel, and Power BI. Portfolio available at estebangarzon.com.

EMPLOYMENT HISTORY

2026 - Present

Chief Technology Officer (CTO), Bynd Bits — Quito

Technology Strategy, Data Infrastructure, and Analytical Support

Define and execute the company's technology strategy, aligning technical initiatives with business goals and long-term growth. Oversee software architecture, infrastructure, networks, and information systems across the organization.

Lead cross-functional technical teams, maintain standards for development and deployment, and support analytical initiatives by aligning systems, data infrastructure, and reporting workflows with business needs.

Jan 2024 - Present

Data Engineer | AI-Driven Automation & BI Specialist, Ecuassist — Quito

ETL, Analytics, Forecasting, and BI Workflows

Designed and implemented automation and analytics solutions using Python, SQL, and PostgreSQL to streamline business processes and improve data visibility. Built ETL and Business Intelligence workflows integrating multiple systems, APIs, and operational data sources.

Cleaned, validated, and enriched large datasets from production, logistics, and financial systems to ensure reporting accuracy. Analyzed patterns, trends, anomalies, and forecasting opportunities, and developed dashboards and reports to communicate findings clearly to stakeholders.

Jan 2023 - Dec 2023

Data Scientist, Gringconstruc — Quito

Rio Blanco and Toabunche Hydroelectric Project

Analyzed flow datasets from multiple rivers to evaluate hydrological behavior and energy generation potential.

Performed statistical projections to estimate flow occurrence, flood frequency, future energy output, and projected revenue from historical and simulated data.

Identified patterns in environmental and operational variables and prepared structured analytical summaries to communicate findings clearly.

Portfolio: estebangarzon.com

Portfolio available at estebangarzon.com.

Features selected work in ETL systems, AI-enabled workflows, business intelligence, forecasting, and operational analytics.

Data Analyst | Financial Advisor, Gringconstruc — Quito

Jan 2022 - Dec 2022

San Antonio 100MW Photovoltaic Project

Analyzed solar radiation and environmental datasets to develop a typical meteorological year projection for energy assessment.

Projected energy production and potential revenue using statistical and financial modeling.

Evaluated data quality, consistency, and analytical assumptions to support accurate decision-making

Jan 2023 - Nov 2023 — Financial Assistant | Hydraulic Engineer, USFQ — Quito

Primavera Project

Analyzed cost data, sales projections, and feasibility variables for a building construction project. Performed economic and financial analysis using indicators such as IRR, NPV, cost-benefit ratio, ROA, and ROE, and prepared structured analytical reports with clear interpretations and recommendations.

Potable Water System for the Canton of General Antonio Elizalde

Analyzed demographic and consumption datasets to estimate growth trends and future demand. Developed revenue forecasts for a public water utility using population and usage projections, evaluated alternative technical approaches, and produced business-oriented recommendations for planning.

EDUCATION

Aug 2018 - Dec 2023 — Civil Engineering, Universidad San Francisco de Quito — Quito

Educational Project 1:

Conducted cost analysis and sales projections for a building construction project, including site evaluation, internal and external financial leverage, and a comprehensive economic study with indicators such as IRR, NPV, and cost-benefit analysis.

Thesis Project:

Developed the design of a hydroelectric power plant on the Toabunche River, integrating hydrological analysis, map generation with ArcGIS, and 3D modeling using Civil 3D. Combined topographic and satellite data with simulation tools to optimize design efficiency and environmental performance.

Focuses on transforming data into strategic insights that drive informed decision-making across organizations.

Combines advanced topics in data analytics, statistics, machine learning, and big data management,

SKILLS

Statistical Analysis	Expert	Power BI	Expert
Data Interpretation	Expert	ETL and Data Preparation	Expert
Data Validation	Expert	Forecasting	Expert
Predictive Modeling	Expert	Sensitivity Analysis	Expert
Data Cleaning	Expert	Business and Financial Analysis	Expert
Data Visualization	Expert	Methodological Rigor	Expert
Reporting and Data Storytelling	Expert	Research Skills	Expert
Python	Expert	Analytical Thinking	Expert
SQL Databases	Expert	Technical Documentation	Expert
Excel	Expert		

LANGUAGES

Ingles	Highly proficient	Espanol	Native speaker

COURSES

Jul 2024 - Aug 2024	Get Started with Python, Google
Jul 2025 - Aug 2025	Foundations of Data Science, Google
