PROFESSIONAL SUMMARY

Business analyst with experience independently delivering structured analytical work across financial modeling, forecasting, feasibility studies, reporting, and business decision support. My recent work has involved translating open-ended business questions into clear models, scenario analyses, dashboards, and written recommendations for stakeholders across operations, infrastructure, energy, and finance-related contexts. I am comfortable managing my own workstream, organizing milestones, producing executive-friendly outputs, and simplifying complex analysis into actionable conclusions. For deeper project detail and technical work samples, please visit **estebangarzon.com**.

Independent Analytical Delivery
Comfortable owning a workstream from scoping through final output, managing milestones and producing structured deliverables with minimal supervision.

Financial And Strategic Analysis
Hands-on work in forecasting, scenario analysis, feasibility studies, profitability logic, and business-case modeling tied to real decisions.

Clear Deliverables And Communication
Strong at turning complex analysis into concise written recommendations, stakeholder-ready summaries, and clear reporting outputs.

Execution Style
Structured, detail-oriented, and comfortable working remotely with autonomy while maintaining high standards of quality and clarity.

RELEVANT EXPERIENCE

Data Engineer | Analytical Delivery, Reporting, and Decision Support

2024 - PRESENT

Remote from Ecuador for a U.S.-based client (Ecuassist) | Independent work across reporting, operational analysis, automation, and stakeholder-facing outputs

- Owned reporting and analytical workstreams from initial business question through final delivery, often working from high-level requirements with minimal day-to-day supervision.
- Built structured outputs that supported management decisions across operations, production, logistics, labor efficiency, utilization, and profitability analysis.
- Translated complex operational and financial data into clear dashboards, summaries, and action-oriented reporting views for stakeholders.
- Managed timelines independently by breaking requests into milestones, validating intermediate outputs, and delivering final results with supporting logic and documentation.
- Worked across multiple data sources and business contexts, allowing me to organize messy information into clear analytical narratives and measurable findings.
- Produced English-language documentation, walkthroughs, and supporting materials for distributed teams using analytical and reporting outputs.
- Balanced hands-on execution with business judgment by identifying what mattered most in the analysis and prioritizing decision-useful outputs.

Data Analyst, Financial Modeling, and Project Support Roles

2022 - 2023

Gringconstruc and Universidad San Francisco de Quito | Energy, construction, and public infrastructure projects

- Built financial and analytical models for hydroelectric, photovoltaic, construction, and water-system projects to answer feasibility, revenue, and investment questions.
- Performed forecasting, scenario analysis, cost-benefit evaluation, and business modeling tied to strategic planning and capital decisions.
- Delivered structured outputs for stakeholders, combining technical analysis with business-ready explanations and recommendations.

SELECTED STRATEGY AND ANALYSIS EVIDENCE

Financial And Operational Modeling

PORTFOLIO

Examples of converting real business and operational questions into measurable analytical outputs and decision-support structures

---

Cross-Source Analytical Synthesis

PORTFOLIO

Work that required pulling together fragmented data, identifying patterns, and structuring findings into usable business insight

---

Client-Ready Reporting And Recommendations

PORTFOLIO

Work samples that show structured communication, clear framing, and the ability to turn analysis into practical recommendations

> More project detail, analytical work, and technical samples are available at **estebangarzon.com**. It provides additional evidence of how I approach structured analysis, financial thinking, and decision-oriented business work.

TAILORED FOR: BUSINESS ANALYST AT GRATIA | MARCH 2026

Role Match

Business analysis · Financial modeling · Strategic thinking · Forecasting · Scenario analysis · Independent execution · Client-ready deliverables · Clear communication

Core Tools

Excel · Financial modeling · Power BI · Excel · SQL · Python · Forecasting · Scenario analysis · Business writing · PostgreSQL · SQL Server · Structured reporting

Why This Fits

Independent workstream ownership

I am used to taking open-ended business questions, structuring the work myself, and delivering high-quality outputs without constant supervision.

Strong analytical synthesis

I can move from raw data and complex inputs to financial logic, scenario comparisons, and clear recommendations that stakeholders can act on.

Remote-ready and structured

I already work remotely with distributed teams and I am comfortable managing timelines, milestones, and communication in a self-directed environment.
