PROFESSIONAL SUMMARY

Native Spanish speaker from Ecuador with strong written command of Spanish, professional English proficiency, and hands-on experience working with AI-enabled systems, technical documentation, structured review, and quality control. My work has required close attention to wording, ambiguity, consistency, tone, and correctness across user-facing content, internal documentation, dashboards, and automation workflows. I am comfortable reviewing outputs for clarity and accuracy, identifying patterns in errors, documenting language-sensitive issues, and producing concise written summaries. For additional work samples and technical context, please visit **estebangarzon.com**.

Spanish Quality And Precision
Strong sensitivity to grammar, wording, register, clarity, and meaning in Ecuadorian Spanish and broader neutral Spanish contexts.

AI Output Review
Experience working with AI-enabled systems and reviewing structured outputs for correctness, usability, consistency, and error patterns.

Annotation And Structure Mindset
Comfortable with categorization, labeling logic, structured analysis, and documenting observations with attention to detail.

Execution Style
Organized, detail-oriented, and reliable in repetitive quality work that requires consistency, concentration, and written communication.

RELEVANT EXPERIENCE

Data Engineer | AI-Enabled Automation, Documentation, and Quality Review

2024 - PRESENT

Remote from Ecuador for a U.S.-based client (Ecuassist) | Work involving AI-enabled workflows, structured review, technical writing, and user-facing content quality

- Produced and maintained English-language technical documentation, instructions, notes, and structured descriptions that required precision, consistency, and clarity.
- Reviewed outputs from automation and AI-assisted workflows to identify incorrect wording, ambiguous content, inconsistent data, and edge cases that could affect user understanding.
- Worked with structured data, labels, categories, and validation rules, which strengthened my ability to annotate, classify, and document patterns carefully.
- Supported AI-related automation work where prompt quality, wording precision, and output review directly influenced the usefulness of the result.
- Investigated recurring issues across systems and outputs, documented findings, and summarized patterns in a concise way for follow-up and improvement.
- Balanced technical accuracy with user-friendly communication when writing internal materials and refining system outputs for real operational use.
- Worked daily in bilingual contexts, switching between Spanish and English while maintaining tone, meaning, and clarity.

Data Analyst, Writing, and Analytical Support Roles

2022 - 2023

Gringconstruc and Universidad San Francisco de Quito | Energy, construction, and public infrastructure projects

- Produced structured written analyses, research summaries, and explanatory content that required careful wording, logical organization, and clarity.
- Strengthened analytical reading and interpretation skills by working with technical information, business assumptions, and evidence-based conclusions.
- Built discipline for detail-oriented review through long-form analytical work, reporting, and documentation under project deadlines.

SELECTED LANGUAGE AND AI-RELEVANT EVIDENCE

Structured Documentation And Explanatory Writing

PORTFOLIO

Examples of technical explanation, structured notes, and written materials that required clarity, consistency, and audience awareness

---

AI-Enabled Workflow Review

PORTFOLIO

Work that involved checking outputs, spotting issues, and improving reliability through careful review of wording, structure, and result quality

---

Pattern Recognition In Quality Issues

PORTFOLIO

Examples of identifying recurring problems, documenting findings, and turning observations into actionable improvement notes

> More project detail, AI-related work, technical samples, and documentation examples are available at **estebangarzon.com**. It provides additional evidence of how I approach precision, structure, and quality in technical and language-sensitive work.

TAILORED FOR: SPANISH ECUADOR AI LANGUAGE / REVIEW OPPORTUNITY | MARCH 2026

Role Match

Native Ecuadorian Spanish · Spanish fluency · English proficiency · Grammar sensitivity · Tone and clarity review · AI output evaluation · Annotation mindset · Detail orientation

Core Tools

Spanish writing · English writing · Microsoft Office · Excel · Documentation · Quality review · Prompt-aware workflows · Pattern analysis · Research summaries · Python · Data labeling mindset · Structured analysis

Why This Fits

Native Ecuadorian Spanish

I am from Ecuador and use Spanish natively, which gives me strong intuition for usage, tone, wording, and naturalness in the target language variant.

Strong written precision

My recent work depends heavily on careful writing, review, and documentation, which transfers well to grammar review, data creation, and AI quality tasks.

AI and structured review exposure

I already work with AI-enabled systems and structured validation, so I can contribute to reviewing outputs, spotting errors, and documenting patterns clearly.

Education

Master's in Data Science and Business Intelligence
Universidad de las Americas | 2025 - 2026

Civil Engineering
Universidad San Francisco de Quito | 2018 - 2023

Languages

Spanish: native, Ecuador

English: professional working proficiency

Selected Courses

Foundations of Data Science | Google

Get Started with Python | Google
