Esteban Garzon, Data Annotator | Linguistic Data Specialist | Data Analyst

Quito, Ecuador, (593) 996788376, estebandre2@hotmail.es

LINKS

LinkedIn | Portfolio: estebangarzon.com

Detail-oriented Data Annotator and AI language specialist with a strong command of Ecuadorian Spanish and professional proficiency in English.

Experienced in reviewing, refining, and structuring high-quality language and data outputs for AI-driven and analytical systems, with hands-on work across automation workflows, ETL pipelines, AI-enabled systems, and multilingual technical documentation.

Brings linguistic sensitivity, analytical thinking, research ability, and operational discipline to support LLM training, NLP tasks, language data improvement, and AI output evaluation.

EMPLOYMENT HISTORY

2026 - Present

Chief Technology Officer (CTO), Bynd Bits — Quito

Technology Strategy, Documentation, and Output Quality

Defined and executed the company's technology strategy while aligning technical direction with business objectives and operational needs. Oversaw architecture, infrastructure, networks, and information systems with a focus on reliability and scalability.

Led multidisciplinary teams, maintained standards for code quality and documentation, and produced internal materials in English and Spanish. Applied analytical review to improve system outputs, operational clarity, and data quality across AI, automation, and business intelligence environments.

Jan 2024 - Present

Data Engineer | AI-Driven Automation & BI Specialist, Ecuassist — Quito

AI Output Review, Documentation, and Structured Data Work

Reviewed, refined, and validated AI-generated and system-generated outputs in English and Spanish to ensure clarity, consistency, correctness, and usability.

Produced technical documentation, process explanations, summaries, and structured notes for AI-assisted systems while reviewing multilingual content and preparing validated data for downstream analytical and AI applications.

Jan 2023 - Dec 2023

Data Scientist, Gringconstruc — Quito

Rio Blanco and Toabunche Hydroelectric Project

Conducted detailed analysis of large datasets to evaluate hydrological behavior and energy potential.

Prepared clear written explanations of analytical results, ensuring technical accuracy and internal consistency.

Identified anomalies and inconsistencies in data patterns through careful review and statistical analysis.

Produced structured reports and summaries based on technical findings.

Portfolio: estebangarzon.com

Portfolio available at estebangarzon.com.

Features selected work in ETL systems, AI-enabled workflows, business intelligence, forecasting, operational analytics, and public downloadable engineering resources.

Data Analyst | Financial Advisor, Gringconstruc — Quito

Jan 2022 - Dec 2022

San Antonio 100MW Photovoltaic Project

Analyzed environmental and operational data using structured review methods and statistical modeling.

Created written summaries and explanatory content to support technical and financial decision-making.

Reviewed data for consistency, accuracy, and interpretability across multiple analytical inputs.

Jan 2023 - Nov 2023 — Financial Assistant | Hydraulic Engineer, USFQ — Quito

Primavera Project

Conducted detailed reviews of financial and project data to identify trends, inconsistencies, and decision-making insights. Prepared structured documentation and analytical summaries with a strong focus on clarity, precision, and reliable evaluation.

Potable Water System for the Canton of General Antonio Elizalde

Analyzed demographic and operational data to support future projections and planning. Reviewed and summarized technical information for reporting and decision support while working carefully with structured data and written findings to ensure consistency and accuracy.

EDUCATION

Aug 2018 - Dec 2023 — Civil Engineering, Universidad San Francisco de Quito — Quito

Educational Project 1:

Conducted analytical review of cost, sales, and project feasibility data using data-driven and structured evaluation methods. Produced written technical interpretations and documented findings clearly to support decision-making.

Thesis Project:

Developed a hydroelectric power plant design integrating hydrological analysis, map generation with ArcGIS, and 3D modeling. The project required careful interpretation of technical information, structured analysis, and clear written documentation of results.

Focuses on transforming data into strategic insights that drive informed decision-making across organizations.

Combines advanced topics in data analytics, statistics, machine learning, big data management, and

SKILLS

Ecuadorian Spanish	High	English Proficiency	Expert
Linguistic Quality Review	Expert	Spanish Language Expertise	Expert
Text Evaluation	Expert	Grammar and Meaning Review	Expert
Content Validation	Expert	Quality Assurance	Expert
Pattern Detection	Expert	Data Analysis	Expert
AI Output Review	Expert	Research Skills	Expert
Written Communication	Expert	Technical Documentation	Expert
Multilingual Content Review	Expert	Python	Expert
SQL Databases	Expert	Microsoft Excel	Expert
Attention to Detail	Expert		

LANGUAGES

Ingles	Highly proficient	Espanol	Native speaker

COURSES

Jul 2024 - Aug 2024	Get Started with Python, Google
Jul 2025 - Aug 2025	Foundations of Data Science, Google
Feb 2026	Foundations of User Experience (UX) Design, Google
